EDUCATION

Bachelor - Game Programming

SAE-Institute, Geneva, Switzerland

10/2021 - 07/2024

Subjects

- Game creation (Unity, Unreal, C++, C#, Python)
- Physics Programming
- Networking
- Optimisation
- Graphics Programming (GLSL, HLSL, Divers nodal systems)
- Source control (Git, Perforce)
- Game Production (SCRUM methodology, Trello, Miro)
- Web Development (HTML, CSS, SQL)
- Video compositing (Adode After Effect)

Federal Diploma of Higher Education - Diagnostician

UPSA-VD, Yverdon-les-Bain, Switzerland

10/2019 - 07/2020

Subjects

- Advanced Electronic
- Embeded Systems
- Advanced Physics
- Client relationship & managment
- Team managment

Federal Capacity Certification (CFC) - Mecatronics

EPSIC, Lausanne, Switzerland

10/2014 - 07/2019

Subjects

- Mecanics
- Electronics
- Physics
- Chemistry Bases

Gymnasium Diploma - Economics, Commerce, Marketing and Law

Gymnase de la Cité, Provence & Bugnon, Lausanne, Switzerland

10/2009 - 07/2013

Subjects

- Accounting
- Marketing
- Law
- Office Suite
- Excels advanced programming
- Italian

WORK EXPERIENCE

Producer

SAE-Institute, Geneva, Switzerland

10/2023 - 10/2024

Description

In my third year at the SAE Institute Geneva, I assumed the challenging role of a producer for two specialized projects.

As the producer, my responsibilities included meticulously organizing project schedules, defining key milestones, and ensuring the teams adhered to timelines to meet project deadlines. Acting as a pivot between different departments, I facilitated seamless communication and collaboration among game programmers, artists, and audio engineers. This coordination was essential to maintain a cohesive vision across the teams and guarantee the successful execution of the projects.

Head of Programming

Styles Studio, Lausanne, Switzerland

2022 - Today

Description

In early 2022, the imperative to establish a legally verified company for the purpose of securing various contracts led my brother, a few colleagues, and myself to initiate the formation of Styles Studio SàRL. Since its inception, I have assumed the position of Head of Programming, taking charge of all responsibilities associated with the role. This includes tasks such as server and tool setup, code review, technical problem resolution, and continual improvement of our development pipeline.

Game Programmer

Dama Dama Games, Lausanne, Switzerland

01/2021 - 05/2021

Description

In 2021, I had the opportunity to start my career as a game developer by co-founding Dama Dama Games, a Swiss indie game studio.

During that time, I applied my commercial knowledge and discovered game development in Unity. A short moment after I started my bachelor's degree at the SAE-Institute, reason for which I stopped working at Dama Dama Games.

Mechatronics Engineer

MAN Truck & Bus, Bussigny, Switzerland

2020 - 2021

Description

During my work as a receptionist, I was presented with an opportunity to join a competing company as a Mechatronics engineer. In this role, I effectively applied my acquired knowledge to carry out tasks with efficiency and precision and had the opportunity to start a Federal Diploma of Higher Education in mechatronics engineering in parallel.

In addition to my primary responsibilities, I took on the role of overseeing Mechanics and Mechatronics apprentices. This experience not only improved my communication skills but also gave me the chance to share my passion and knowledge with aspiring students in the field.

Receptionist

LARAG SA, Echandens, Switzerland

2018 - 2019

Description

While I was finishing my training, I briefly took on a role in the client reception sector due to being recognized as a person with good communication skills and language proficiency.

In this position, I had the opportunity to enhance my social skills and proved to be highly valuable. It was during this time that I discovered my aptitude for human interaction receiving positive feedback from my superiors.

Mecatronics Apprentice

LARAG SA, Echandens, Switzerland

2014 - 2019

Description

After completing my studies and gaining experience in the commercial sector, I decided to transition to a new field and began training in Mechatronics.

Throughout this period, I immersed myself in various disciplines, including mechanics, electronics, electricity, physics, and chemistry. I learned the intricacies of vehicle maintenance, from routine tasks to the repair of engines and complex systems.

Diverse IT & commercial work experiences

Switzerland & England

2008 - 2014

Description

Throughout my school years, I explored various work environments tailored to our individual preferences. Initially drawn to the field of IT, I delved into the realm of computers through multiple work experiences before eventually transitioning to a commercial domain. In this sector, I predominantly engaged in administrative roles in both Switzerland and England.

ORGANIZATIONS
