samuel.styles93@gmail.com | +41 79 465 11 08 | Lausanne (VD), Switzerland

Profile

Software engineer specialized in C++ and C#, with a BSc (First Class Honours) and a background in industrial mechatronics. Experienced from low-level systems and native libraries to developer tooling and a commercial product shipped as co-founder and lead programmer. C++ Institute and Unity certified. Looking for a software engineering role building reliable, high-performance systems.

Technical Skills

Languages	C++, C#, C, Python, JavaScript/TypeScript, SQL, HLSL/GLSL, x86-64 ASM
Frameworks	.NET, Unity, Unreal Engine, OpenGL, Qt (PyQt), SFML
Tools	Git, Perforce, CMake, vcpkg, Visual Studio, GDB, Valgrind, CI/CD, Linux
Methods	Agile, Scrum, profiling & optimization, technical documentation

Experience

Software Engineer (Internship)

Jun 2025 – Sep 2025

Lab4Tech, Lausanne

- Designed a **native C++ library (DLL)** for procedural map generation (BSP, cellular automata, random walk), integrated into Unity through **C++/C# interop** and custom editor tooling (CMake, vcpkg); **adopted by senior developers** for map creation
- Built Quiz Trainer , a web-based exam training tool (JavaScript) that converts documents into JSON question sets
- Improved the C++ training material for the CPE, CPA and CPP certifications, helping **3 interns obtain 2 certifications each**

Co-Founder & Lead Programmer

Jan 2022 – Jul 2024

Styles Studio Sàrl, Lausanne

- Led development of Run4YourLight (Unity/C#, team of 5) from prototype to **commercial Steam release**, including Steamworks integration; **Indie Game Nation Jury & Public Award**
- Set up and managed the company's IT infrastructure and development tools; led technical operations and strategy
- Mentored junior developers and taught programming courses for the Swiss Digital Academy
- Presented the product to **5'000+ visitors** at Fantasy Basel, Zurich Pop Con, Numerik Games and Japan Tours Festival

Mechatronics Technician

Aug 2014 – Jan 2021

LARAG SA | MAN Truck & Bus Schweiz AG

- Diagnosed and fixed faults in electrical, electronic and mechanical vehicle systems using **CAN bus** diagnostic software
- Applied systematic root-cause analysis to complex control systems, working with engineers on interdisciplinary issues

Selected Projects

- **Bachelor Thesis: Real-Time Fur Rendering** (C#, Unity, HLSL) – shell-texturing fur shader, taken from a naive implementation to an optimized version
- **OpenGL Rendering Engine** (C++, OpenGL, GLSL) – custom engine with deferred rendering, PBR, IBL, shadow mapping, SSAO and instancing
- **Rasterizer Optimization** (C++, OpenMP, Tracy) – software rasterizer profiled and optimized from a naive single-threaded version to a multithreaded one
- **Desktop Tools** (Python, PyQt) – file converter/merger, job application tracker and media blurring utilities

Certifications

Unity Certified Professional Programmer – *ISEIG, Lausanne* – UCPP-520 — **Aug 2025**

Professional Scrum Product Owner™ I – *Lab4Tech, Lausanne* – PSPO I — **Aug 2025**

C++ Certified Associate Programmer – *ISEIG, Lausanne* – CPA — **Jul 2025**

Education

BSc (Hons) Games Programming – First Class Honours - Diploma — **2024**

University of Hertfordshire (UK), via SAE Institute Geneva

CFC Diploma in Mechatronics - Diploma — **2019**

EPSIC, Lausanne
